Bove and Davis' **DIVING MEDICINE** 4th Edition

Alfred A. Bove, MD, PhD

"An excellent reference for practitioners who may be called upon to evaluate prospective divers, to answer diving-related questions, or to provide appropriate therapy for diving mishaps."—*Wilderness & Environmental Medicine*, review of the previous edition

Bove and Davis' Diving Medicine has earned a worldwide reputation as the definitive source on diving safety and the management of diving-related health conditions. It covers basic diving physiology • the pathophysiology of decompression sickness • marine toxicology • assessment of fitness for diving • special considerations for female, elderly, and pediatric divers • diving-related problems in people with pre-existing medical conditions such as pulmonary, cardiac, and neurologic disease • and much more.

Inside this thoroughly updated **4th Edition**, you'll find...

- Brand-new chapters on *Kinetics of Inert Gas* • *Marine Poisoning and Intoxication* • and *Diabetes and Diving*.
- Completely revised chapters on *Medical Evaluation for Sport Diving* • *Medical Evaluation for Commercial Diving* • and *Medical Evaluation for Military Diving*.
- State-of-the-art protocols for managing decompression accidents, drowning, and hypothermia.
- And a great deal of other essential new information!

With millions of people now engaging in recreational, occupational, and military diving, **Bove and Davis' Diving Medicine, 4th Edition** is an essential resource for any practitioner who sees these patients.
